

Stretch Your Horizons

Join Us for the MST 214B - 215 classes at Saddleback! Spring, 2008

Advanced Cruising Under Sail - MST 214B and Vessel Command and Organization - MST 215, will take you offshore to Catalina, San Clemente Island, and Santa Barbara Island on **two 3-day cruises under sail**. Learn about voyage preparation, navigation, sail trim, anchoring, sailing at night, heavy weather tactics, and more.

Here's what MST 214B and MST 215 have to offer:

1. Heavy Weather Experience - You can read about it all you want to, but the key to becoming comfortable in a real blow is having been there before with an experienced captain. You'll get that in this class.
2. Night-Time Passagemaking - Many weekend sailors never make it to Santa Barbara Island because of the demands of the overnight passage. Plunge right in with us and experience sunrise at sea, and get to a beautiful island well beyond Catalina.
3. More Days On The Water - To borrow a phrase from the Ocean Institute, "Experience is the teacher." Before you get out there on your own, learn who has right of way with a freighter at night, what to do if your anchor drags, procedures for sailing in Small Craft Advisory conditions, and more.

Island cruise dates are Feb 16-18 over Presidents' Day weekend and May 1-4, with Thurs evening departure.

Classes meet at the Youth & Group facility in the Dana Point harbor on alternate Mondays, 7:00 - 10:00 pm, beginning January 14. For information on registration, the class, and other questions you may have, call Mark Howe at 949-496-3453; 949-525-3914 cell [email mhowe@saddleback.edu], or Marc Hughston at 949-939-8123 [mhughston@saddleback.edu]. Also you can visit the class website at www.electricmarine.com and follow the links to Saddleback classes.
